

ORIGIN'S APPROACH IS ONPOINT

onPoint is Origin's structured approach to facing your challenges. This technique is the result of years of working on projects, solving business problems with thorough analysis, software, and emerging technology.

onPoint is specific, easy to follow, proven to work, and comprehensive. We apply this approach to every project we undertake; regardless of how large or small.

- **Continuous** – **onPoint** is a five-step continuous process improvement cycle for solving problems. These steps provide a 'how-to' guide to our professionals and our clients that promotes achieving the expected outcomes of any effort.
- **Conscientious** – **onPoint** is mindful of the complexity of our efforts, the seriousness of your issues, and the variables or 'moving parts' that are part of any solution. Origin addresses each complexity and satisfies the total picture so that we not only define the solution, but make it work for you.
- **Comprehensive** – **onPoint** emphasizes all aspects of a business problem and solution. We understand that all components of a solution should be addressed equally. **onPoint** spells it out.
